World Of Science(Science News)

-Quantum particles can feel the influence of gravitational fields they never touch.

If you're superstitious, a black cat in your path is bad luck, even if you keep your distance. Likewise, in quantum physics, particles can feel the influence of magnetic fields that they never come into direct contact with. Now scientists have shown that this eerie quantum effect holds not just for magnetic fields, but for gravity too — and it's no superstition.

-A genetic analysis hints at why COVID-19 can mess with smell

For many people, one of the fastest tip-offs that they have COVID-19 is the loss of taste or smell. Now researchers have pinpointed some genetic variants in people that may make it more likely that the coronavirus might rob them of these senses.

D.I.Y Satellite Model for Science Project

Materials-

cardboard, aluminum foil, and A4 sheet paper.

-let us make this, so first, we need to a paper into a half semicircle and stick from the corners. cut a cardboard in a small circle shape and paste it into the base as shown in the video. now make a box by using cardboard and cover it with aluminum foil and make two holes on opposite sides. now take two rectangle shape cardboard sheets, cover it with white paper and stick some small pieces of blue paper on it. stick these two cardboard sheets into that box. also stick that semicircle on that box. and color it. your satellite is ready.

You can use this satellite as your school science project and can make your room more attractive.

My Favourite book

GREEN PLANET (ENVIRONMENTAL ISSUES)

The environment plays a significant role to support life on earth. But there are some issues that are causing damage to life and the ecosystem of the earth. It is related not only to the environment but with everyone that lives on the planet. There are hundreds of issues that are causing damage to the environment. The major environmental issues are pollution, environmental degradation, resource depletion, and climatic change.

Here are 5 simple ways you can help the environment and spark others to become more environmentally aware.

- 1) Replace disposable items with reusable
- 2) Pass on paper
- 3) Conserve water & electricity
- 4) Support local & environmental friendly products
- 5) Recycle & Recover

-Pramiti Singh

Books are friends who never leave your side. I enjoy reading books. They have the power to help us travel through worlds without moving from our places.

Harry Potter was a series of books authored by one of the most eminent writers of our generation, J.K. Rowling. These books showcase the wizarding world and its workings. Although the series contains seven books, I have a particular favourite. My favourite book from the series is *The Goblet of Fire*. When I started reading the book, it caught my attention instantly. Even though I had read all the previous parts, none of the books caught my attention as this one did. The concept of the Tri-wizard tournament is one of the most brilliant pieces I have come across in the Harry Potter series. Even though the books are about the world of wizards and magic, the series contains a lot of lessons for young people to learn. Firstly, it teaches us the importance of friendship. Further, the series of Harry Potter taught me that no one is perfect. Everyone has good and evil inside them. We are the ones who choose what we wish to be. This helped me in making better choices and becoming a better human being. Finally, these books gave me hope. It gave me the strength to cling on to hope in the most desperate times just like Harry did all his life. These are some of the most essential things I learned from Harry Potter. In conclusion, while there were many movies made in the books. Nothing beats the essence and originality of the books. Therefore, the Goblet of Fire remains to be my favourite book.

Music World (My favourite singer/Musician)

Shreya Ghoshal

Music is an expression of an individual, a society and even culture.

"When words fail, music speaks" -Hans Christian Anderson

A country so rich and diverse as ours, overflows with talent and passion. Music has taken a deep root not just in our culture, but also everyday. Shreya Ghoshal is a prominent playback Indian singer of the modern day. She is a world renowned Hindustani classical and ghazal singer who features in genres of music. Her songs have been featured in many Indian films. She has several awards to her name, including Filmfare awards. She has also been a judge on many television reality shows. She holds a massive fan following among both young and old. Besides being a playback singer, she has given live concerts all over the world. She is an inspiration to the younger generations to pursue their dreams in the field of music and art. It falls on us to fulfil these dreams and encourage others to appreciate music

A visit to a place of tourist interest

JAPAN

We all know Japan is a very unique country and that not many places in the world can be compared with it. The culture, the history, food, and the place itself is something that you can't find anywhere else.

The Olympics 2021 was held at Tokyo, Japan. Japan is also famous for anime which was started by Osamu Tezuka. Dragon Ballz, Naruto are few of the most popular anime. Majestic Mount Fuji is the country's highest mountain peak. This majestic and fabled mountain is tall enough to be seen from Tokyo.

Every year more than a million people climb Mount Fuji as an act of pilgrimage. One of Japan's most visited cities, Kyoto attracts more than 10 million visitors annually. Most of them are here to explore Kyoto's fine old streets and architecture. One of the most famous is the Zen temple of Hokokuji was founded in the 14th century. The temple features a beautiful bamboo garden. Kamakura is also well-known for its iconic bronze Buddha. Sitting tall at over 13 metres in height, this impressive statue has been out in the open for over 500 years.

Himeji Castle is considered the most spectacular castle in Japan. Both a World Heritage Site and national treasure. Japan is a great country and I would love to live there someday. There are lots of great places I can check out and learn from. There are lots of activities that I can enjoy during the day and also during night. Everything over there is an Adventure.

SUMANA VIII-E

Hi friends !!!

I am Shelemala Harshika studying in Little Flower High School. I am a young dancer. Dancing makes me cheerful and lively. I figured out it was my way of expressing happiness and joy. Dance is an art in motion. I made my way through it by choreographing my dance moves. It is always an adventure when I am on stage to perform. I feel my body frolics as the music plays. Not to mention, it is when I forget my moves I get more creative. As time passed dancing became my passion, a passion that lit my life up. I wanted to do more of it. Then I decided to begin my YouTube channel, Harshika the best. YouTube gave me a platform to make dance videos and upload them. Now, dance has become a part of me. I would like to thank my parents for supporting me. I am grateful to my sister who always helps me to film videos and edit them. I am so grateful to God for giving me a wonderful family. I thank all my well-wishers, my school, and family for supporting me in my life.
